

RELEASE NOTES

Update Date: July 14, 2022

Dear Customers,

We are happy to let you know that we are live with the latest release of the **Customer Traceability Report**. You can see the changes in the same link where you usually access the [reports](#).

Changes in the Customer Traceability report:

- Some concepts definitions in the Glossary tab have been modified and improved based on the information available.
- Number of transactions linked to a Farm CH in an account's supply chain in the Origin tab.
- Fix year-to-date measures in the Purchases and Sales tab.
- Traceability Level information in Product Type, Variety and Traceability level tab has been changed from non-equivalent volumes to equivalent volumes. However, in the table you can still find the Traceability level in non-equivalent volumes.
- New Transaction Status Overview tab: All transaction status by Seller CH, Origin Country and Farm CH in equivalent volumes by years.
- New explanations added for the new tabs.
- "Last Refresh Date" is now called "Load Date" and has been moved at the bottom right side.

Data availability:

- In the current Customer Traceability report, the data availability is all the crops traded in MultiTrace and GIP (Coffee, Cocoa, Tea and Hazelnut) . From Marketplace 2.0, we include Coffee, Cocoa and Tea.

Best regards,

On behalf of the Insights Delivery Team
